OUR MISSION

Established in 1994, Wildlife Rescue, Inc. is a 501(c)(3) tax-exempt nonprofit organization dedicated to alleviating the suffering of sick, injured and orphaned animals. We provide assistance to the public with wildlife emergencies through the rescue and rehabilitation of wildlife with the goal to release back to nature. We provide educational opportunities to communities to foster a respect for our wild neighbors and implement humane non-lethal programs. We are dedicated to providing humane solutions for co-existing with wildlife. We believe there is always a humane answer to any wildlife issue. We are an all volunteer organization and no one gets a salary.

Raining Raccoons

At Wildlife Rescue the new barn that replaced the one that burned down was ready for spring babies and we got an incredible amount of baby raccoons. Unfortunately there are so few rehabilitators or veterinarians that will take raccoons, Barbara was inundated. The spring storms were hard on babies falling out of tree nests and unfortunately many people trap mothers in the spring and summer unaware that they have babies. The lucky babies are brought to Wildlife Rescue.

We have great accommodations for raccoons as they grow, with indoor and outdoor areas for all their needs.

Barbara would like to thank all the old and new volunteers for their dedication. They worked whenever needed, picked up extra days, came evenings and nights. We could not have taken care of the large numbers of critters this year without their efforts.

Some Raccoons, when they are too small to be released, will have to be wintered over at Wildlife Rescue.

Certificate of Fawn Adoption In Memory of Gerda Deterer

www.wildliferescueinc.org

I am a white-tail deer fawn.

I was rescued and brought to Wildlife Rescue, Inc. Fawns come here when they are attacked by domestic dogs, suffer from lawn mower and farm equipment injuries, or when their Mom's get killed.

Here I will be bottle fed 3 times a day and stay with other rescued fawns in a fenced in pasture.

I will start to nibble on grass and hay at about 6 weeks old and will be weaned off my bottle slowly and given whole corn and deer pellets to supplement my diet. When I am about 3 months old, I will still have my spots but I will be strong enough to forage for food on my own and I will be released back to the wild.

Fearing her scent may attract predators, a mother deer leaves her fawn alone most of the day. If you encounter a fawn lying quietly by itself - and it looks healthy - leave it alone. Mom will be back.

Sugar in her Holiday Bow!

Sugar, Gerda's pot bellied pig was adopted by the Catoctin Wildlife Preserve & Zoo when Gerda passed away. This picture is from their staff and they tell us: Sugar is still very personable and friendly with the animal care staff and our visiting public and enjoys spending her days playing with the assorted critters in the barn yard. On some of these cold winter evenings a few of our baby goats have been sleeping on her back with their feet carefully tucked under them to keep warm. From the little grunting sounds coming from Miss Sugar, it is apparent that she is enjoying it as much as they are.

Board of Director, Meredith Callahan visits Catoctin with her children throughout the year and reports all the animals from Gerda's are doing well.
